

Hearts at Work is more than a tag line to our families . . .

"I can't say enough about the staff and what they do for the residents. It's not easy work yet they always have a smile and are gentle and caring with Mother. We've been blessed finding Heartland Village."

"As a daughter who resides out of state it is very comforting to have my mother as a resident of Elmcroft. The staff stays in touch with me providing pictures and information so that I can stay involved."

Heartland Village

Making the Present as Meaningful as the Past

Caring for someone with Alzheimer's takes a very special kind of person - someone with a generous heart, a warm spirit and a genuine compassion for others. You will find these special people in Heartland Village, our memory support neighborhood.

Training

Heartland Village caregivers undergo a specialized training program, which includes:

- Senior Living University Video and Workbook program, recognized by the Alzheimer's Association
- Key Elements of Dementia Care guidelines, as recommended by the Alzheimer's Association

Programming

Heartland Village provides a highly specialized program for our residents living with Alzheimer's disease or related dementias.

- Structured programming helps residents maintain the sense of identity and self-esteem
- Person-centered approach to care that focuses on each resident as a unique individual

Life Enrichment Activities

Our activity programming helps each resident express herself as the person she knows herself to be in a way that accommodates her disability and honors her abilities, values, habits and familiar roles.

- Moment to Moment interaction based on individual needs
- An environment developed to be interactive in daily living
- Home-like dining experience to nourish the body and spirit
- Stimulate treasured past experiences and interaction

ELMCROFT ASSISTED LIVING

Hearts at work.
